

FileMaker Pro Advanced

OBJECTIVES

Explore advanced calculations, data auto-entry, validation, and relationships; build advanced layouts and work with complex scripting functions; look at networking functions, such as web publishing, user accounts, and database security; complex relationships.

Duration: 1 Day

1. FIELD OPTIONS

- Advanced value lists
- Advanced calculations
- Field auto-entry
- Field validation
- Container fields

2. MANY-TO-MANY RELATIONSHIPS

- Relationship types
- Many-to-many relationship formation
- Lookups
- Related table summary

3. ADVANCED LAYOUTS

- Layout efficiency boosters
- Layout parts
- Object appearance
- Merge fields
- Field entry behavior

4. COMPLEX SCRIPTS

- Chained scripts
- Related record scripts
- Intercepting errors
- Script parameters
- Script problems

5. NETWORKING DATABASES

- Database security
- Multiple user access
- Web publishing

6. APPENDIX A: COMPLEX RELATIONSHIPS

- Self-joining relationships
- Dependent value lists
- Multiple relationships to one table
- Complex criteria relationships
